

The Australian Qualifications Framework (AQF) includes qualifications across the different education and training sectors and in a broad range of fields of study/disciplines.

The terms used in the AQF are not sector specific and do not preclude sector-specific terms being used in the different education and training sectors provided that there is consistency in application of the concept.

To maximise consistency in understanding and interpretation of the terminology used in the AQF, the terminology is defined in this glossary. The terminology is an essential component of the levels criteria, qualification type descriptors and policies which cannot be correctly used without the use of the definitions in the glossary.

All of the terms in the glossary are defined in the context of their use in AQF policies. Only those words or phrases that occur in the AQF levels criteria, qualification type specifications or policies are included in the glossary.
